

Year 11 Revision Schedule 2024-25

| | |
|------------------------|--|
| Subject/Course: | GCSE Combined Science (Physics) – Foundation Tier |
| Student Name: | |

| | | Topic | Key knowledge/skills/questions | Resources/activities/links |
|---------------|---|---|--|--|
| Week 1 | Monday 20th January | <p><i>Student-led approach:</i> Your two weakest topics / sub-topics on Paper 2 (identified by you as 'red' on your Paper 2 learning checklist)</p> <p><i>Core coverage:</i> Waves I (6.6.1) – wave description and terminology, wave properties, wave equation, RP8 (Measurement of waves)</p> | <ul style="list-style-type: none"> Recall of core knowledge in topic Use and application of core knowledge <p>Waves I:</p> <ul style="list-style-type: none"> recall and use of wave terminology drawing and labelling diagrams of transverse and longitudinal waves recall, use and application of wave equation understanding of Required Practical set up understanding and description of measurement techniques that reduce uncertainties and errors Knowledge and use of terms – resolution, accuracy, error, uncertainty | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> Relearn material using new sources, eg revision guide, BBC Bitesize Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize |

| | | | | |
|--|--|---|---|--|
| | | | | <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) • Medium demand knowledge and application questions from, eg, revision work books • High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Waves I: https://www.bbc.co.uk/bitesize/guides/zwkn2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/z3yq4qt/revision/1 https://www.bbc.co.uk/bitesize/guides/zqnnh39/revision/1</p> |
| <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Week 2</p> | <p>Monday 27th January</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 2 (identified by you as 'red' on your Paper 2 learning checklist)</p> <p><i>Core coverage:</i> Waves II (6.6.2) – types, properties and uses of EM waves, reflection and refraction, RP9 (refraction), production of radio waves, emission and absorption of IR, RP10 (Absorption of IR)</p> | <ul style="list-style-type: none"> • Recall of core knowledge in topic • Use and application of core knowledge <p>Waves II:</p> <ul style="list-style-type: none"> • Recall names, typical frequencies and wavelengths of parts of the EM spectrum • Know and describe uses and dangers of parts of the EM spectrum • Explain why some EM waves are more suitable for communication than others • Draw and label ray diagrams for reflection and refraction • Describe production and reception of radio waves • Understanding of Required Practical set up • Describe how the nature of materials affects its absorption or emission of IR waves | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> • Relearn material using new sources, eg revision guide, BBC Bitesize • Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) • Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> • Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) • Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) • Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) |

| | | | | |
|--------|--|--|--|---|
| | | | | <ul style="list-style-type: none"> • Medium demand knowledge and application questions from, eg, revision work books • High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Waves II: https://www.bbc.co.uk/bitesize/guides/z2xjdxs/revision/1 https://www.bbc.co.uk/bitesize/guides/ztpm7p3/revision/1 https://www.bbc.co.uk/bitesize/guides/zqnnh39/revision/1</p> |
| Week 3 | <p>Monday 3rd February</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 2 (identified by you as 'red' or 'amber' on your Paper 2 learning checklist)</p> <p><i>Core coverage:</i> Forces I (6.5.1, 6.5.2, 6.5.3, 6.5.6 (part)) – weight, adding and subtracting forces, work done by a force, stretching and compression forces, energy stored by elastic material, RP6 (Force and extension), velocity and acceleration, motion graphs</p> | <ul style="list-style-type: none"> • Recall of core knowledge in topic • Use and application of core knowledge • Application of knowledge to novel contexts • Analysis of novel contexts <p>Forces I:</p> <ul style="list-style-type: none"> • Recall and use the equation to calculate weight • Determine and describe the resultant force acting on an object • Recall and use the equation to calculate work done • Recall and use the equation to calculate the extension of an object caused by a force • Recall and use the equation to calculate the energy stored in by an elastic object • Understanding of Required Practical set up • Recall and use the equations to calculate speed, acceleration (the 'suvat' equations) • Draw and interpret distance-time graphs and velocity-time graphs • Determine the gradient of graphs, including using the tangent method • Understanding of Required Practical set up | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> • Relearn material using new sources, eg revision guide, BBC Bitesize • Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) • Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> • Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) • Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) • Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) • Medium demand knowledge and application questions from, eg, revision work books • High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions |

| | | | | |
|--------|---|--|---|--|
| | | | | <p>from www.physicsandmathstutor.com and www.aqa.org.uk</p> <p>BBC Bitesize links for Forces I: https://www.bbc.co.uk/bitesize/guides/zskn2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/zskn2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/z232k2p/revision/1 https://www.bbc.co.uk/bitesize/guides/z9hk3k7/revision/1 https://www.bbc.co.uk/bitesize/guides/z2wy6yc/revision/1 https://www.bbc.co.uk/bitesize/guides/zc7q4qt/revision/1</p> |
| Week 4 | <p>Monday 10th February</p> | <p><i>Student-led approach:</i> Your two weakest topics / sub-topics on Paper 1 (identified by you as 'red' on your Paper 1 learning checklist)</p> <p><i>Core coverage:</i> Energy (6.1.1, 6.1.2, 6.1.3) – energy stores and transfers, conservation of energy, thermal energy transfer, RP1 (specific heat capacity) RP2 (thermal insulation), power, efficiency, energy resources, choices about energy resources</p> | <ul style="list-style-type: none"> Recall of core knowledge in topic Use and application of core knowledge <p>Energy:</p> <ul style="list-style-type: none"> Recall the eight energy stores Recall the four energy pathways Describe energy transfers between objects in terms of systems, stores and pathways Understanding energy transfers in the context of conservation of energy Describe methods for reducing wasted energy transfers Recall and use the equations to calculate efficiency Recall and use the equations to calculate power Recall and use the equation to calculate the energy stored in by a moving object Recall and use the equation to calculate the change in energy stored by an object moving vertically in a gravitational field Recall and use the equation to calculate the energy stored in by an elastic object Recall and use the equation to calculate the change in temperature of an object due to a change in the thermal energy stored by the object | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> Relearn material using new sources, eg revision guide, BBC Bitesize Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) Medium demand knowledge and application questions from, eg, revision work books High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk |

| | | | | |
|--------|---|--|---|--|
| | | | <ul style="list-style-type: none"> • Understanding of Required Practical set up • Identify renewable and non-renewable energy resources • Explain choices in use of energy resources by countries | <p>BBC Bitesize links for Energy:</p> <p>https://www.bbc.co.uk/bitesize/guides/z8hsrwx/revision/1</p> <p>https://www.bbc.co.uk/bitesize/guides/zp8jtv4/revision/1</p> <p>https://www.bbc.co.uk/bitesize/guides/z2gjt4/revision/1</p> <p>https://www.bbc.co.uk/bitesize/guides/zchgdxs/revision/1</p> <p>https://www.bbc.co.uk/bitesize/guides/z3nktv4/revision/1</p> |
| Week 5 | <p>Half Term Monday 17th February</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 1 (identified by you as 'red' on your Paper 1 learning checklist)</p> <p><i>Core coverage:</i> Particle Model (6.3.1, 6.3.2, 6.3.3) – density, changes in state, RP5 (Density), internal energy, specific heat, latent heat, cooling / heating curves, gas pressure and temperature</p> | <ul style="list-style-type: none"> • Recall of core knowledge in topic • Use and application of core knowledge <p>Particle Model:</p> <ul style="list-style-type: none"> • Recall and use the equation to calculate density • Convert between units of different magnitude • Describe states of matter in terms of particle arrangement, energy and properties • Describe changes of state in terms of changes in particle energy and attraction • Understanding energy transfers in the context of conservation of energy • Recall and describe the components of internal energy • Understand how the components of energy change during heating and changes of state • Sketch, understand and interpret cooling and heating curves • Describe and explain how the motion of gas particles gives rise to pressure exerted by a gas • Describe and explain in terms of particle motion how changes to the temperature of a gas affects the pressure it exerts • Understanding of Required Practical set up | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> • Relearn material using new sources, eg revision guide, BBC Bitesize • Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) • Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> • Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) • Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) • Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) • Medium demand knowledge and application questions from, eg, revision work books • High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Particle Model:</p> |

| Week 6 | Monday 24th February | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 1 (identified by you as 'red' on your Paper 1 learning checklist)</p> <p><i>Core coverage:</i> Electricity I (6.2.1, 6.2.2) – circuit symbols, charge, current, potential difference, resistance, RP3 (Factors affecting resistance), RP4 (Current-potential difference characteristics), series and parallel circuits, circuit rules</p> | <ul style="list-style-type: none"> Recall of core knowledge in topic Use and application of core knowledge <p>Electricity I:</p> <ul style="list-style-type: none"> Draw and interpret circuit diagrams using circuit symbols Define current, potential difference, resistance, power Recall and use the equation that links charge, current and time Recall and use the equation that links resistance, potential difference and current Describe and explain how resistance arises in circuit components Describe and explain the factors that affect resistance Identify and describe series and parallel sections of circuits Recall and use the 'circuit rules' to interpret circuit diagrams and make calculations Understanding of Required Practical set up | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> Relearn material using new sources, eg revision guide, BBC Bitesize Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) Medium demand knowledge and application questions from, eg, revision work books High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Electricity I: https://www.bbc.co.uk/bitesize/guides/zqvq4qt/revision/1 https://www.bbc.co.uk/bitesize/guides/zqf6msg/revision/1</p> |

| | | | | |
|--------|--|--|--|--|
| Week 7 | <p>Monday 3rd March</p> | <p><i>Student-led approach:</i> Your two weakest topics / sub-topics on Paper 2 (identified by you as 'red' on your Paper 2 learning checklist)</p> <p><i>Core coverage:</i> Waves I (6.6.1) – wave description and terminology, wave properties, wave equation, RP8 (Measurement of waves).</p> | <ul style="list-style-type: none"> • Recall of core knowledge in topic • Use and application of core knowledge <p>Waves I:</p> <ul style="list-style-type: none"> • recall and use of wave terminology • drawing and labelling diagrams of transverse and longitudinal waves • recall, use and application of wave equation • understanding of Required Practical set up • understanding and description of measurement techniques that reduce uncertainties and errors • Knowledge and use of terms – resolution, accuracy, error, uncertainty | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> • Relearn material using new sources, eg revision guide, BBC Bitesize • Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) • Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> • Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) • Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) • Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) • Medium demand knowledge and application questions from, eg, revision work books • High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Waves I: https://www.bbc.co.uk/bitesize/guides/zwkn2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/z3yq4qt/revision/1 https://www.bbc.co.uk/bitesize/guides/zqnnh39/revision/1</p> |
| Week 8 | <p>Monday 10th March</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 2 (identified by you as 'red' on your Paper 2 learning checklist)</p> | <ul style="list-style-type: none"> • Recall of core knowledge in topic • Use and application of core knowledge | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> • Relearn material using new sources, eg revision guide, BBC Bitesize |

| | | | | |
|----------------------|--|---|---|---|
| | | <p><i>Core coverage:</i> Waves II (6.6.2) – types, properties and uses of EM waves, refraction, RP9 (refraction), production of radio waves, emission and absorption of IR, RP10 (Absorption of IR)</p> | <p>Waves II:</p> <ul style="list-style-type: none"> Recall names, typical frequencies and wavelengths of parts of the EM spectrum Know and describe uses and dangers of parts of the EM spectrum Explain why some EM waves are more suitable for communication than others Draw and label ray diagrams for refraction Describe production and reception of radio waves Understanding of Required Practical set up Describe how the nature of materials affects its absorption or emission of IR waves | <ul style="list-style-type: none"> Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) Add to your lesson notes using revision guides, textbooks, BBC Bitesize <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) Medium demand knowledge and application questions from, eg, revision work books High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Waves II: https://www.bbc.co.uk/bitesize/guides/z2xjdxs/revision/1 https://www.bbc.co.uk/bitesize/guides/ztpm7p3/revision/1 https://www.bbc.co.uk/bitesize/guides/zqnnh39/revision/1</p> |
| <p>Week 9</p> | <p>Monday 17th March</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 2 (identified by you as 'red' on your Paper 2 learning checklist)</p> <p><i>Core coverage:</i></p> | <ul style="list-style-type: none"> Recall of core knowledge in topic Use and application of core knowledge <p>Forces I:</p> | <p><i>'Red' topics – review tasks:</i></p> <ul style="list-style-type: none"> Relearn material using new sources, eg revision guide, BBC Bitesize Compile knowledge organiser, using your class notes, revision guides, textbooks, BBC Bitesize (see www.hayestl.com for knowledge organiser tips) Add to your lesson notes using revision guides, textbooks, BBC Bitesize |

| | | | | |
|-----------------------|--|---|---|---|
| | | <p>Forces I (6.5.1, 6.5.2, 6.5.3, 6.5.6 (part)) – weight, adding and subtracting forces, work done by a force, stretching and compression forces, energy stored by elastic material, RP6 (Force and extension), velocity and acceleration, motion graphs</p> | <ul style="list-style-type: none"> Recall and use the equation to calculate weight Determine and describe the resultant force acting on an object Recall and use the equation to calculate work done Recall and use the equation to calculate the extension of an object caused by a force Recall and use the equation to calculate the energy stored in by an elastic object Understanding of Required Practical set up Recall and use the equations to calculate speed, acceleration (the 'suvat' equations) Draw and interpret distance-time graphs and velocity-time graphs Determine the gradient of graphs, including using the tangent method Understanding of Required Practical set up | <p><i>'Red' topics – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions from, eg, revision guide or textbooks or the relevant topics from Www.educake.co.uk <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) Medium demand knowledge and application questions from, eg, revision work books High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Forces I: https://www.bbc.co.uk/bitesize/guides/zskn2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/zskn2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/z232k2p/revision/1 https://www.bbc.co.uk/bitesize/guides/z9hk3k7/revision/1 https://www.bbc.co.uk/bitesize/guides/z2wy6yc/revision/1 https://www.bbc.co.uk/bitesize/guides/zc7q4qt/revision/1</p> |
| <p>Week 10</p> | <p>Monday 24th March</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 1 (identified by you as 'amber' on your Paper 1 learning checklist)</p> <p><i>Core coverage:</i></p> | <ul style="list-style-type: none"> Recall of core knowledge in topic Use and application of core knowledge Application of knowledge to novel contexts Analysis of novel contexts <p>Electricity II:</p> | <p><i>'Amber' topics – review tasks:</i></p> <ul style="list-style-type: none"> Blank page retrieval, followed by supplementary notes and links (see www.hayestl.com for blank page retrieval tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize Cornell notes successive summarisation of topics, including 'flash card' summary (see www.hayestl.com for Cornell notes tips) |

| | | | | |
|---|--|--|--|---|
| | | <p>Electricity II (6.2.3, 6.2.4, 6.2.5) – direct and alternating current, safety in mains electricity systems, electric power and energy transfers in circuits, National Grid</p> | <ul style="list-style-type: none"> Describe differences between direct and alternating current Draw and label the connections in a UK mains plug Describe the operation of a fuse and a circuit breaker Identify safety measures in UK electricity supplies Define electric power Recall and use the equation that links power, current and potential difference Recall and use the equation that links power, current and resistance Describe the heating effect of current Describe the main features of the National Grid <p>Explain the function of step-up and step-down transformers within the National Grid</p> | <ul style="list-style-type: none"> Dual coding of key ideas or diagrams (see www.hayestl.com for dual coding tips) <p><i>'Amber' topics – practice tasks:</i></p> <ul style="list-style-type: none"> Medium demand knowledge and application questions from, eg, revision work books Exam questions completed to time Exam paper and test paper question analysis (TEEPEE model) <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) Medium demand knowledge and application questions from, eg, revision work books High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Electricity II: https://www.bbc.co.uk/bitesize/guides/zw8n2nb/revision/1 https://www.bbc.co.uk/bitesize/guides/zqf6msg/revision/1</p> |
| <p style="writing-mode: vertical-rl; transform: rotate(180deg);">Week 11</p> | <p>Monday 31st March</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 1 (identified by you as 'amber' on your Paper 1 learning checklist)</p> <p><i>Core coverage:</i></p> | <ul style="list-style-type: none"> Recall of core knowledge in topic Use and application of core knowledge Application of knowledge to novel contexts Analysis of novel contexts <p>Atomic structure:</p> | <p><i>Amber' topics – review tasks:</i></p> <ul style="list-style-type: none"> Blank page retrieval, followed by supplementary notes and links (see www.hayestl.com for blank page retrieval tips) Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize Cornell notes successive summarisation of topics, including 'flash card' summary (see www.hayestl.com for Cornell notes tips) |

| | | <p>Atomic Structure (6.4.1, 6.4.2, 6.4.3) – structure of the atom, development of atomic model, properties of nuclear radiation, nuclear decay equations, determining half-life, background radiation, contamination and irradiation</p> | <ul style="list-style-type: none"> • Draw and label a diagram of an atom • Describe the properties of electrons, protons and neutrons • Describe the main points in the development of the atomic model • Describe the plum pudding model, the 'gold foil scattering experiment' and why the latter caused a change our model of the atom • Understand and describe the properties of alpha, beta and gamma radiation, particularly penetration and ionising power • Draw and interpret half life graphs and data tables • Determine half life from a graph • Describe causes and consequences of background radiation, contamination and irradiation, and safety precautions when using radioactive materials | <ul style="list-style-type: none"> • Dual coding of key ideas or diagrams (see www.hayestl.com for dual coding tips) <p><i>'Amber' topics – practice tasks:</i></p> <ul style="list-style-type: none"> • Medium demand knowledge and application questions from, eg, revision work books • Exam questions completed to time • Exam paper and test paper question analysis (TEEPEE model) <p><i>'Core coverage' – review tasks:</i></p> <ul style="list-style-type: none"> • Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips) • Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips) • Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize <p><i>'Core coverage' – practice tasks:</i></p> <ul style="list-style-type: none"> • Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from Www.educake.co.uk) • Medium demand knowledge and application questions from, eg, revision work books • High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk <p>BBC Bitesize links for Atomic structure: https://www.bbc.co.uk/bitesize/guides/zpctjty/revision/1 https://www.bbc.co.uk/bitesize/guides/z964y4j/revision/1 https://www.bbc.co.uk/bitesize/guides/zxbnh39/revision/1 https://www.bbc.co.uk/bitesize/guides/zp4vfcw/revision/1 https://www.bbc.co.uk/bitesize/guides/zpkbv9q/revision/1</p> |
| <p>Week 12</p> | <p>Easter Monday 7th April</p> | <p><i>Student-led approach:</i> Your next two weakest topics / sub-topics on Paper 2 (identified by you as 'amber' on your Paper 2 learning checklist)</p> | <ul style="list-style-type: none"> • Recall of core knowledge in topic • Use and application of core knowledge • Application of knowledge to novel contexts | <p><i>Amber' topics – review tasks:</i></p> <ul style="list-style-type: none"> • Blank page retrieval, followed by supplementary notes and links (see www.hayestl.com for blank page retrieval tips) |

Core coverage:

Forces II (6.5.4, 6.5.5, 6.5.6 (part), 6.5.7) – Newton’s laws of motion, RP7 (force and acceleration), braking

- Analysis of novel contexts

Forces II:

- Recall and use Newton’s laws of motion to describe scenarios involving forces
- Calculate braking distances and use concept of work to determine braking distances
- Interpret stopping distance and thinking distance graphs and data tables
- Understanding of Required Practical set up

- Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize
- Cornell notes successive summarisation of topics, including ‘flash card’ summary (see www.hayestl.com for Cornell notes tips)
- Dual coding of key ideas or diagrams (see www.hayestl.com for dual coding tips)

‘Amber’ topics – practice tasks:

- Medium demand knowledge and application questions from, eg, revision work books
- Exam questions completed to time
- Exam paper and test paper question analysis (TEEP model)

‘Core coverage’ – review tasks:

- Cornell notes successive summarisation of topics (see www.hayestl.com for Cornell notes tips)
- Mind maps linking concepts and knowledge within the topic and with other topics (see www.hayestl.com for mind mapping tips)
- Elaboration and extension of notes, using other sources, eg, revision guides, textbooks, BBC Bitesize

‘Core coverage’ – practice tasks:

- Low demand knowledge checking questions (eg, from revision guide or textbooks or the relevant topics from [Www.educake.co.uk](http://www.educake.co.uk))
- Medium demand knowledge and application questions from, eg, revision work books
- High demand knowledge, application and analysis questions from, eg, revision workbooks; exam questions from www.physicsandmathstutor.com and www.aqa.org.uk
